- Authorities
-

Why the BSR LNG Cluster?

- Joint Marketing Platform
- Expand Network
- Obtain New Knowledge
- Competence Development
- Create Joint Business Projects
- Business Model Application Support

BSR LNG Cluster Services

How to join the BSR LNG Cluster

Go LNG Denmark

Go LNG Denmark is a network established to connect and promote sustainable growth in Danish companies offering and using LNG services, knowledge and technologies.

Together we will work to strengthen the development of LNG business opportunities in Denmark, in the Baltic Sea Region and in other international markets.

Go LNG Denmark will take it's off-set in the maritime industry but we will equally be looking into the use of LNG in other modalities, industries and usages such as LNG for power supply, for cooling energy and as fuel for heavy road transportation.

Together we will explore innovations to open up new markets and adding on new end-users to the existing LNG infrastructure in Denmark and in the Baltic Sea Region.

Go LNG Denmark can offer its members:

- A joint marketing platform
- The possibility to expand your network
- B2B meetings and joint business projects
- New knowledge and competence development
